ENVIRONMENTAL &
BUSHFIRE PROOF HOUSING
FOR
OWNER BUILDERS

UNIBUILD projects comply with the Building Code of Australia.

UNIBUILD bushfire proof housing complies with the recently revised National Fire Code AS 3958:2009.

UNIBUILD projects are approved by third party Structural Engineers and Building Certifiers.

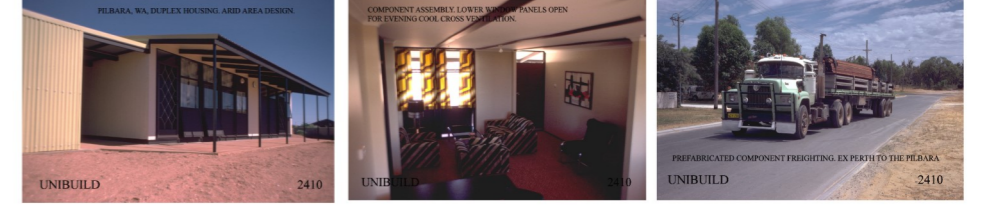

OWNER - BUILDER DESIGN
The Unibuild Client Design Sheet assists Owners - Builders in sketching their space requirements to meet their construction budget.

Each Unibuild design "square" is 0.8 SQM of floor area.

Assume each "square" costs \$1000 to build. (Estimated current cost to be confirmed after inspection).

If the building budget is \$200,000 then the floor area will be 200 Unibuild design "squares".

The attached Client Design Sheet is a proven communication device to begin a project. Please fit your ideas to Unibuild and we shall make arrangements to meet on site with a view to developing the project to completion.
